build and simulation. Since its founding in 1982, Autodesk has been making a difference in the way the world designs and makes things. Choose Autodesk Autodesk brings together the world's leading digital creative tools into one easy-to-use platform that gives you the power to ideate, visualize, and bring your visions to life. Autodesk is committed to inspiring a global design revolution. We are creating the world's most inspiring digital platforms and software for everyone involved in the creation, delivery, and monetization of a wide variety of content. In 2017, more than 70% of the Fortune 100 surveyed by Fortune Magazine and MIT Sloan Management Review had already begun using, or planned to use, some form of 3D technology within the next five years. From 2015 to 2018, the number of 3D models created in the UK more than doubled (to 14.2 million), and in Canada alone, an estimated \$150 billion worth of 3D models were created, invested in, and sold in 2018. 3D printing and additive manufacturing are expected to grow from \$65.3 billion in 2018 to \$150.9 billion by 2030, a CAGR of 11.9%. The largest 3D printer markets are currently China, USA, and Germany. Our global, hyper-connected world has prompted a high demand for robust platforms that connect people to information. Autodesk was founded in 1982 with a mission to make everyone's ideas real — and we are driven by that mission today. Our 1,000+ design teams across 100+ countries work with customers to turn ideas into real products, businesses, and innovations. Our Autodesk Design Cloud is an all-in-one platform that serves as the foundation for our product design and digital manufacturing capabilities. Our ever-evolving, data-driven culture delivers innovative design capabilities — the way the world designs and makes things. Autodesk Research and Innovation is focused on finding new ways to inspire and push the boundaries of design technology through research, data, collaboration and new ideas. The tools you use to build your world are the same tools we use to make the world's most respected brands, vehicles, and buildings. Our platform and tools are trusted by the world's leading professionals, including those in architecture, automotive, aerospace, construction, education, engineering, and manufacturing, among others.Q: Swift delegate method 82157476af
